No exceedances - June, July, August 2018

Legacy and Community Relations

Volunteering and Charity

Money raised from the event went towards Tideway's three staff charities, as well as the Shadwell Basin Outdoor Activity Centre, which gets young people from some of the most disadvantaged communities in London onto the river every year

Women in Engineering 2018

In June, as part of Women in Engineering Week 2018, Tower Hamlets Guides and Brownies visited Chambers Wharf, and we visited a Brownie Pack in Bow

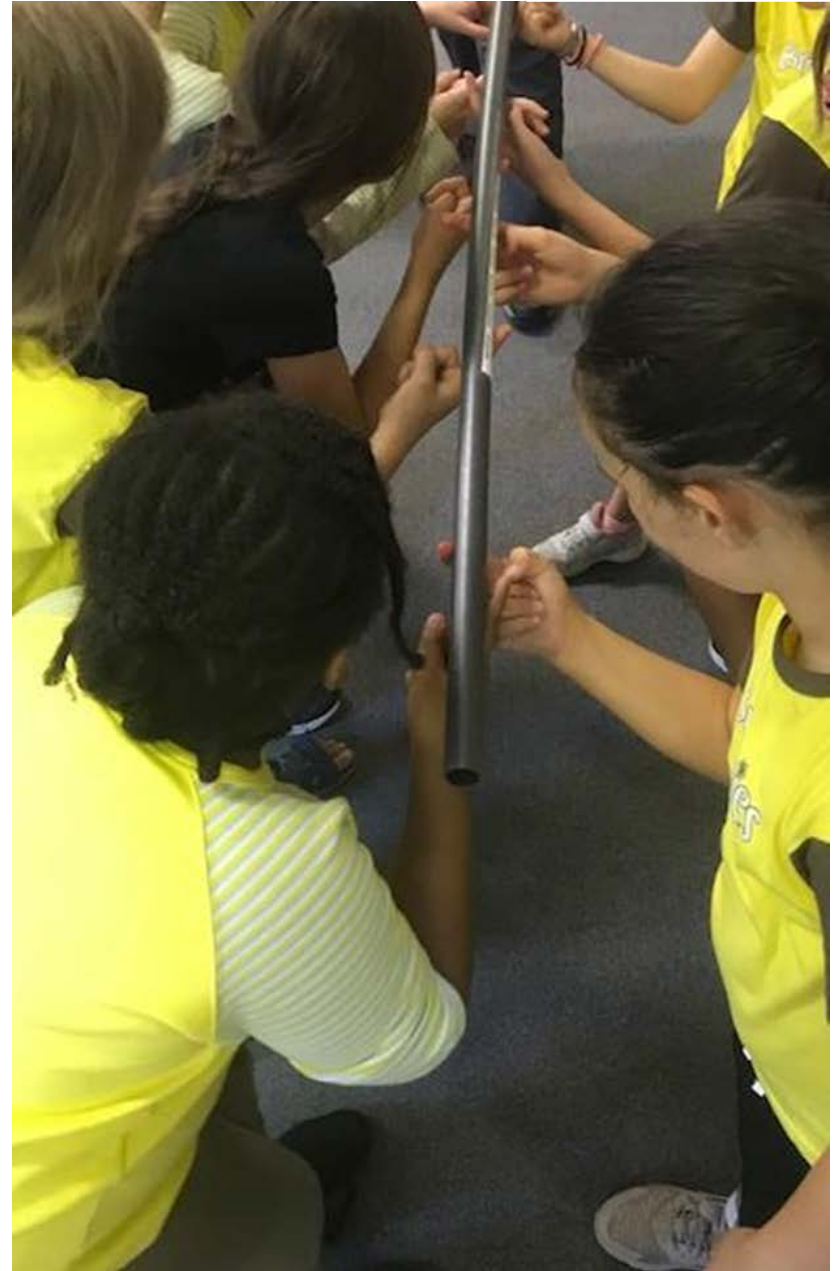

The girls learnt that women can make a positive impact in engineering and construction - as well as taking part in some fun tasks

After a quick talk about engineering and the Tideway project, the girls got stuck into lots of activities, to get them thinking like engineers.

These included building spaghetti and marshmallow towers, balloon hovercrafts, lava lamps and making lemon fizz volcanoes

And of course a challenge to 'raise the bar' which was this year's theme

RIVER TIMES – Summer Edition

A digital copy of this publication can be found at
https://www.tideway.london/media/4081/river-times_east_summer_18.pdf

Next Generation of Engineering

Apprenticeships

- Three new civil engineering apprentices have joined our team
- Two are from Newham, one recently finished studying at the London Design Engineering UTC
- Two are studying degree level 6 qualifications

Work experience

- Four work experience students with us over the Summer.
- Two from the St Michael's College, one from Walworth Academy and one from East Young Leaders Academy (EYLA)

Here's some of their feedback:

"Thanks to my work experience I have been able to develop a wide range of skills, including working as part of a team, listening and organisation. It's also helped boost my confidence."

"Getting a feel of engineering at Tideway has really encouraged me to go on and work in engineering."

"Engineering is now definitely an option for my future."

- World of Work visit from students taking part in the National Citizen Service summer programme 'The Challenge'
- They were working on a project to raise money for charity tackling domestic violence
- They practised their Dragon's Den style presentation with us.

Foreshore Clean-up

King Edward Memorial Foreshore Site

- Tideway East volunteers headed down to the foreshore in July to clean up plastic rubbish
- The team made a great effort and were able to collect many bags full of plastic
- This waste is taken away and properly disposed

Plastic is a hazardous material polluting our waterways

It's putting wildlife at risk, harming and in some cases mutating aquatic life

Foreshore clean-up on the Isle of Dogs

Staff volunteers, accompanied by the neighbouring Ecology Consultancy, based at Bermondsey Wall West, took to the Isle of Dogs foreshore to remove plastic waste embedded within its beach.

Within the fifty bags of plastic rubbish collected they found a bag of Smiths salted peanuts with an expiry date of January 1984 - Which makes them 34 years old!

Newcastle Draw Dock - August 2018

CELEBRATING THE RIVER THAMES

SUNDAY 23 SEPT
PUTNEY EMBANKMENT, 11-5PM
SHADWELL BASIN, 11-5PM

Join us for a free, family festival to *Celebrate the life and times of the river Thames*. Taking place in two locations across London, the Foreshore Festival offers you the chance to try stand-up paddleboarding (SUP), kayaking and rowing – or get down and dirty during mudlarking sessions to explore hundreds of years of history buried in the river banks.

Tideway 2017/18 Annual Report

Significant progress has been made on the project over the last 12 months and much of it is captured in Tideway's 2017/18 Annual Report.

In the year to 31 March 2018, we hit some key milestones, with all but one of our 21 construction sites up and running, the completion of the first shafts and the welcoming of three of our six TBMs.

The report highlights Tideway's commitment to use the river and cut the number of lorries needed for the project – with nearly 420,000 tonnes of material moved by barge to date and more than 20,000 lorry loads avoided.

Report can be found at:

https://www.tideway.london/media/4029/tideway-annual_report_2017-18.pdf

TIDEWAY TIME LAPSE FILM – JULY 2018

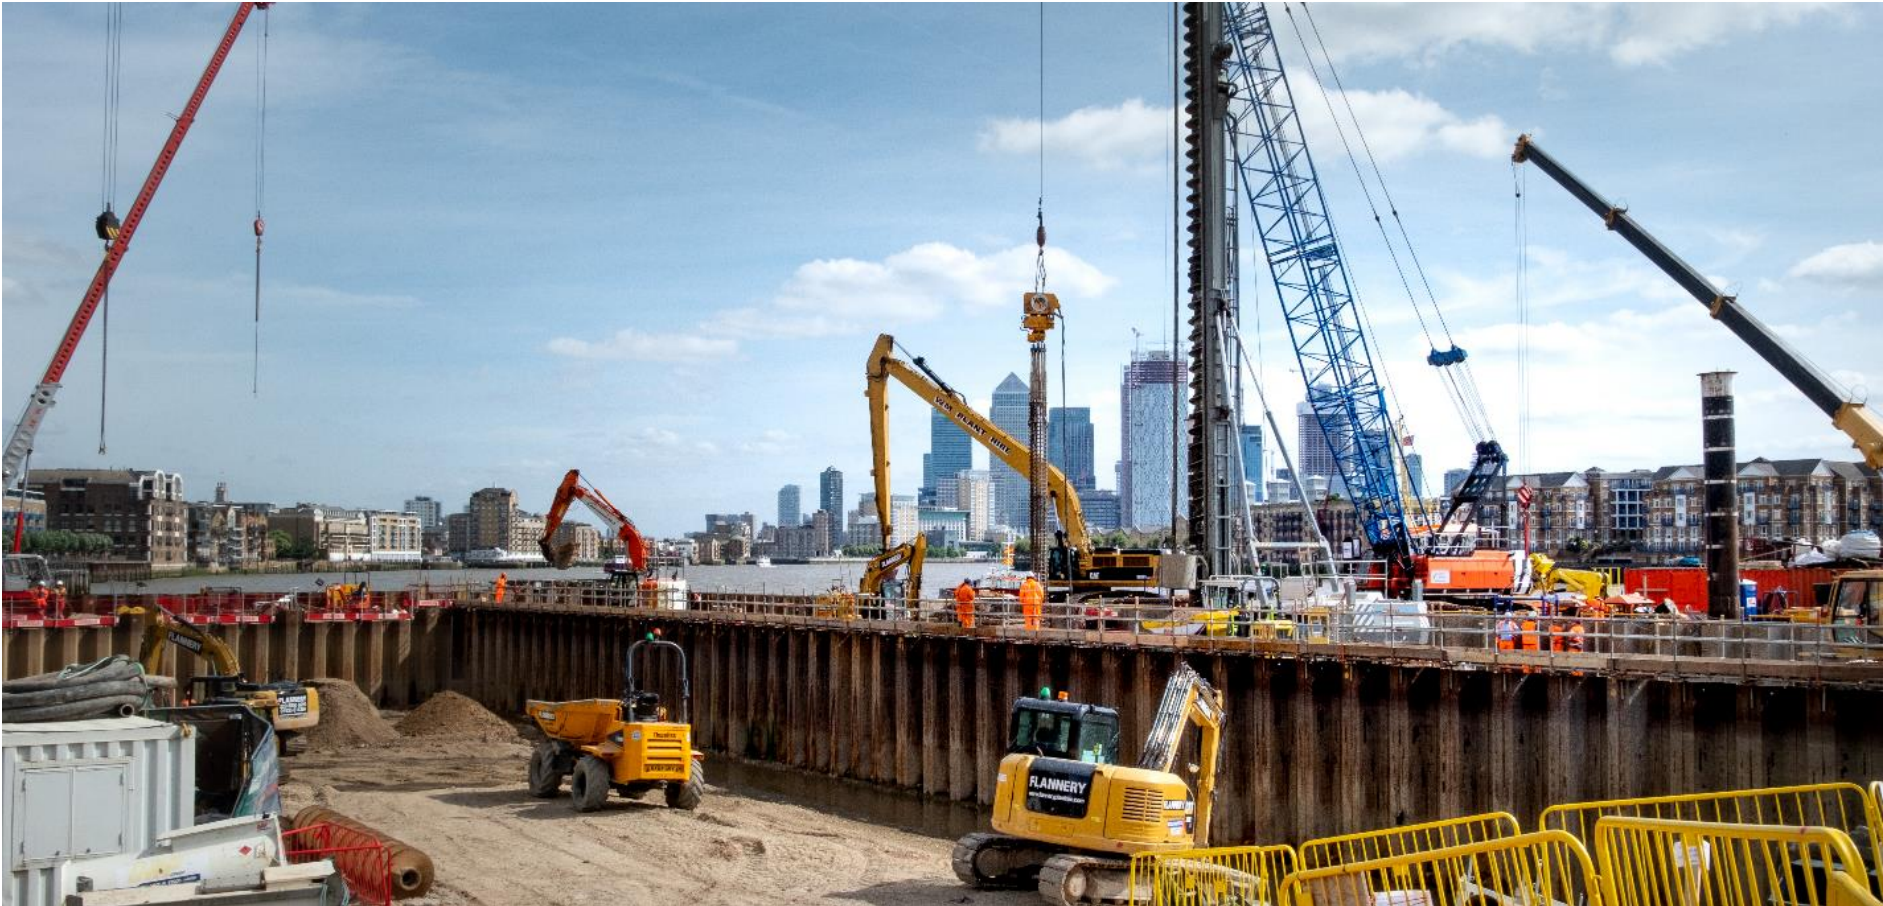

New diversion sheet piles now complete

August 2018

Cofferdam strengthening works ongoing

Reinforced concrete piles

August 2018

Piles are broken down ready for concrete slab and concrete beams

August 2018

Piles are broken down ready for concrete slab and concrete beams

Water main laid through park

August 2018

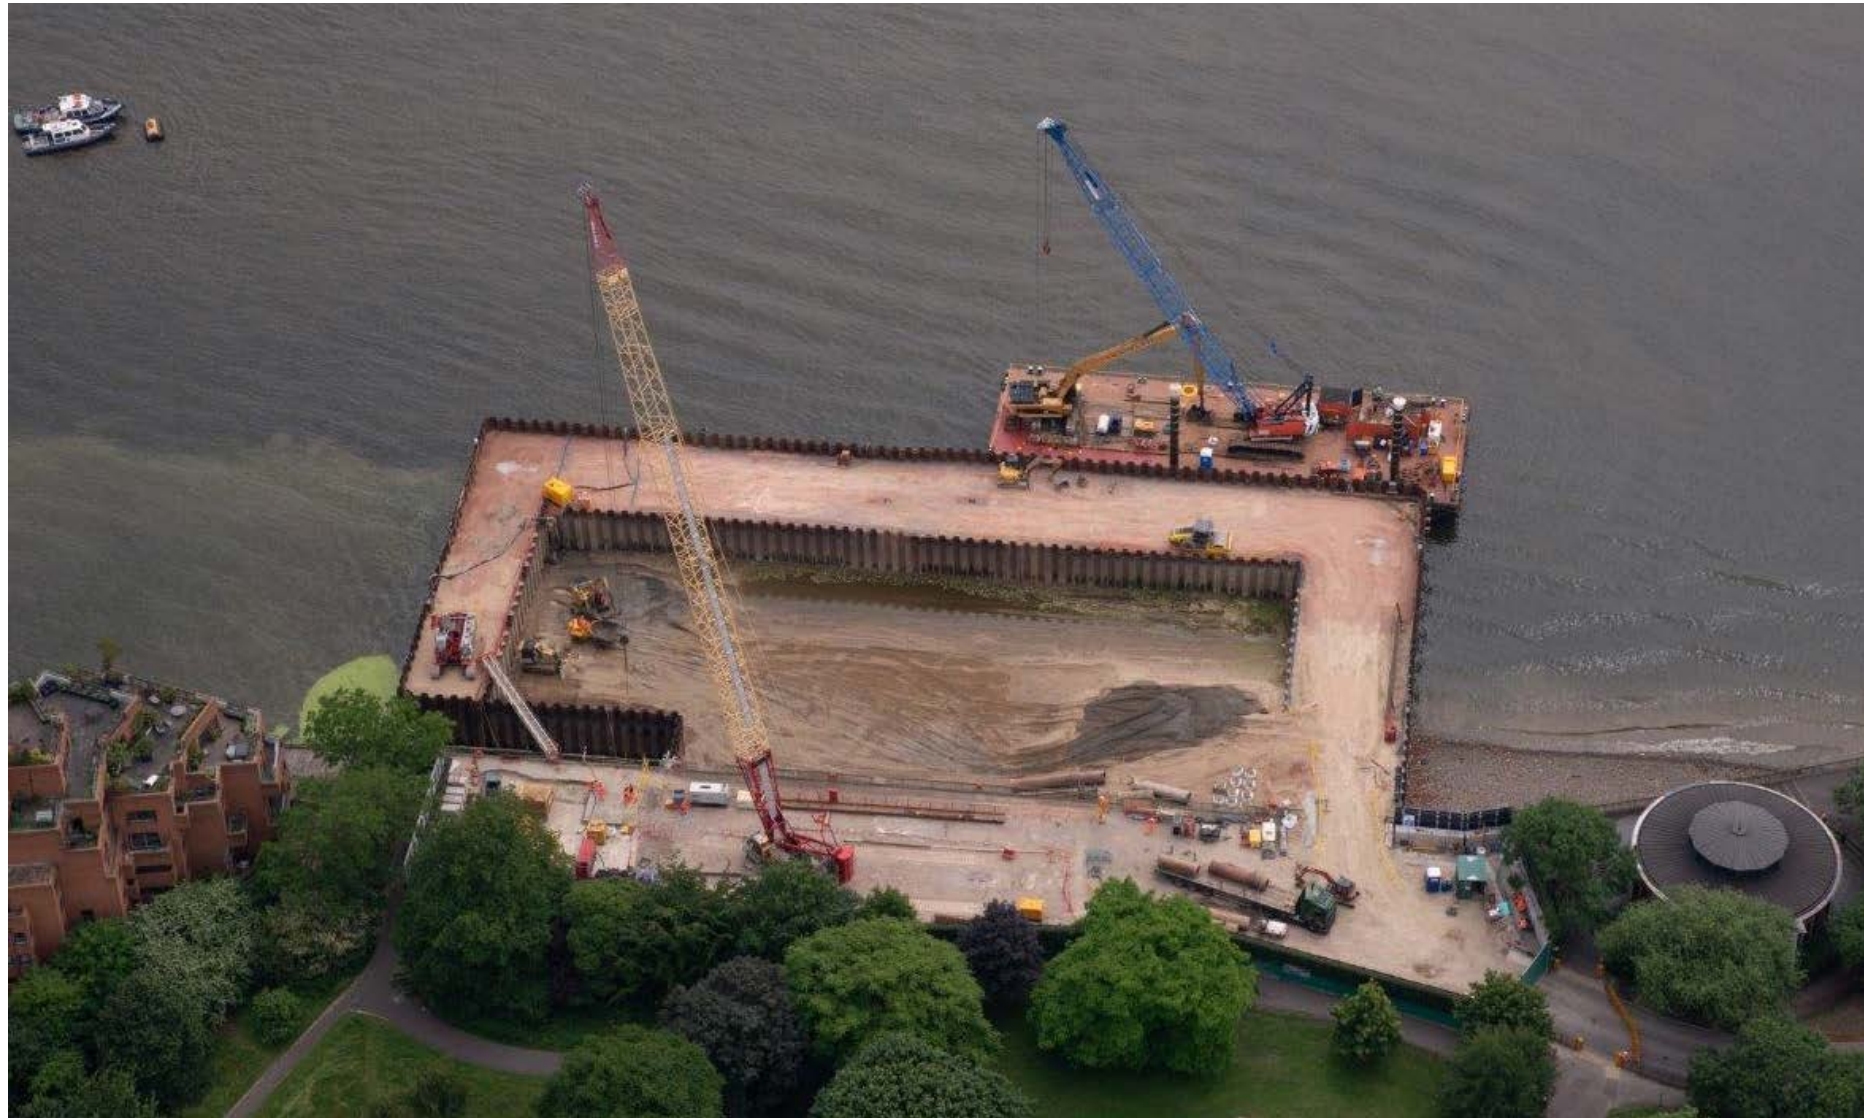

June 2018

June 2018

June 2018

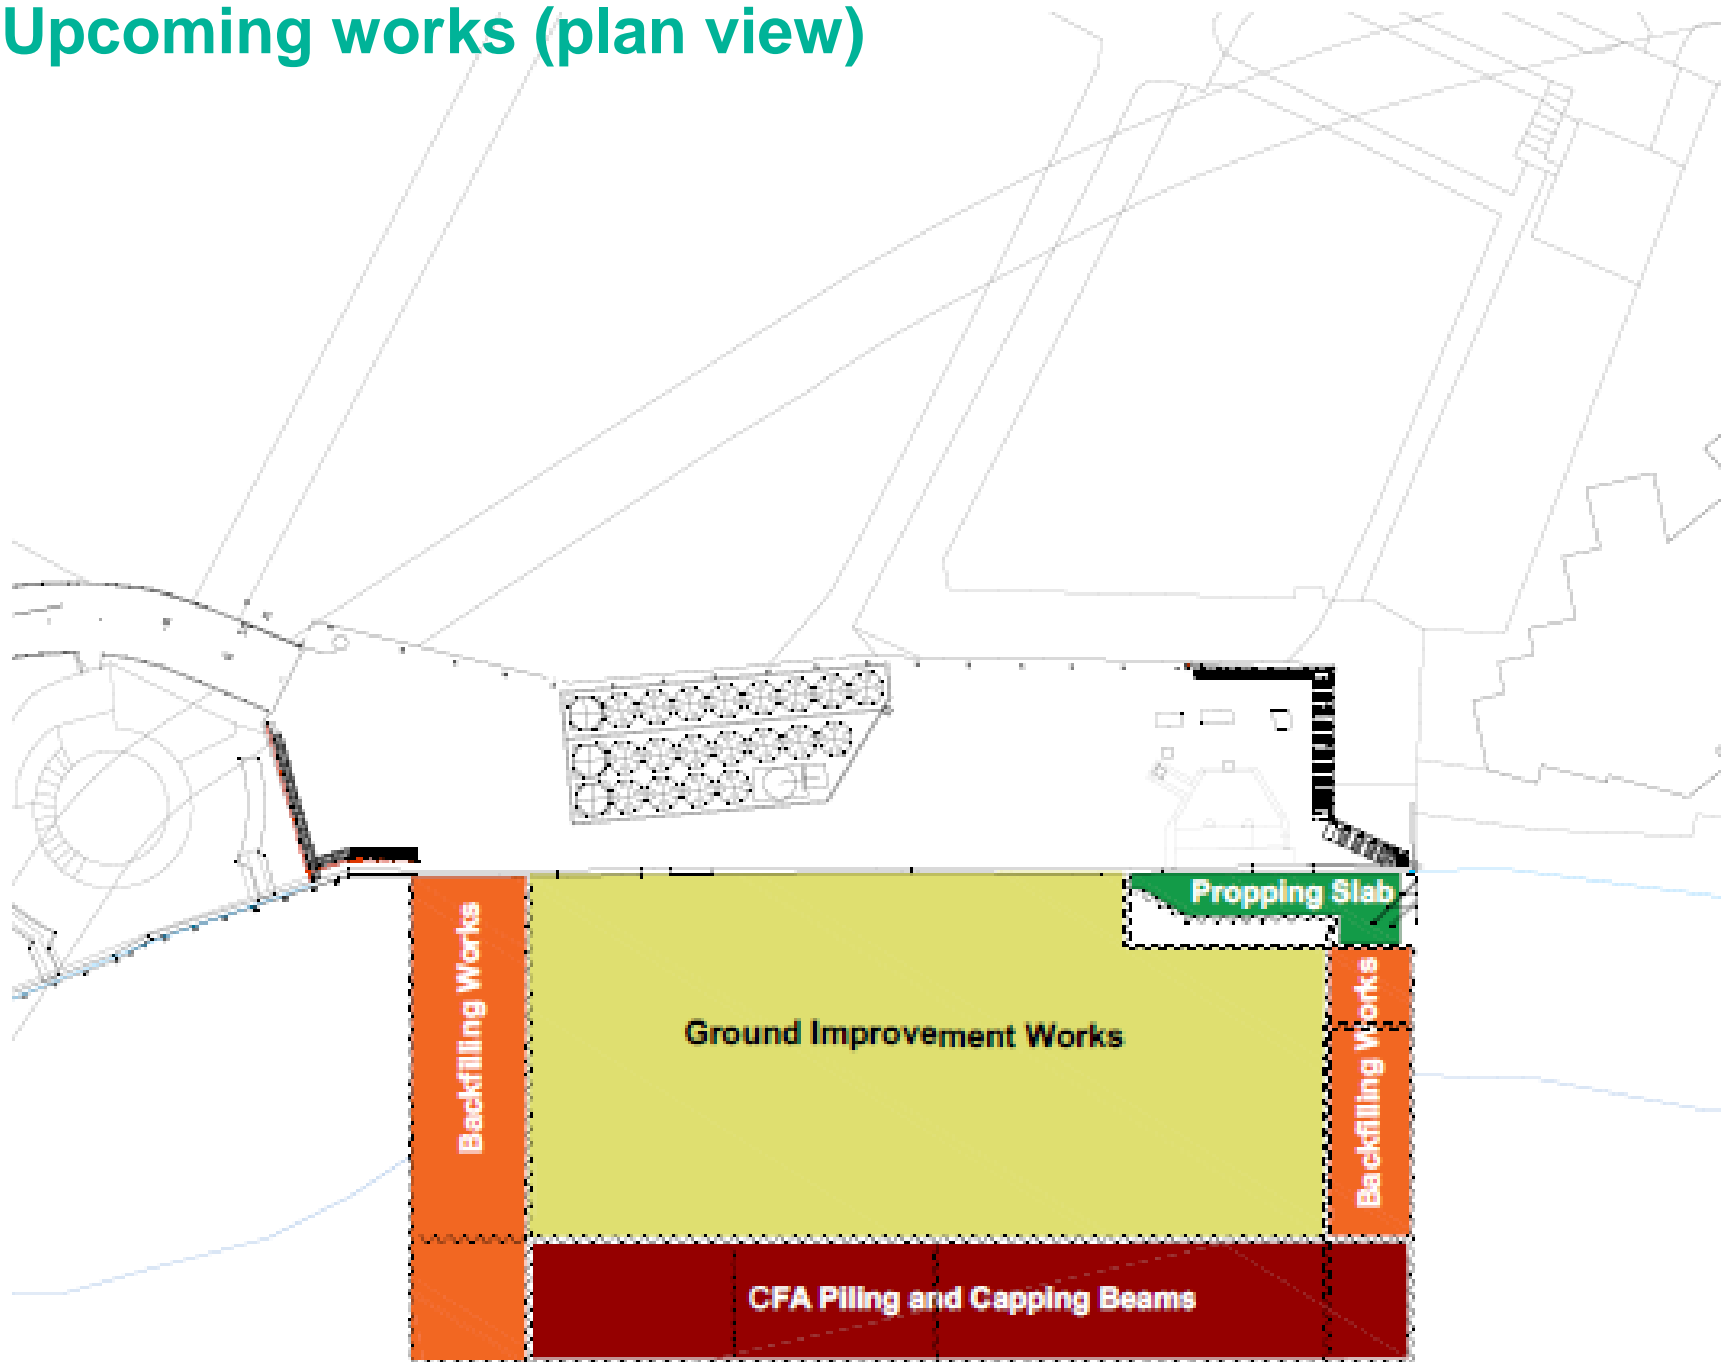

Upcoming work

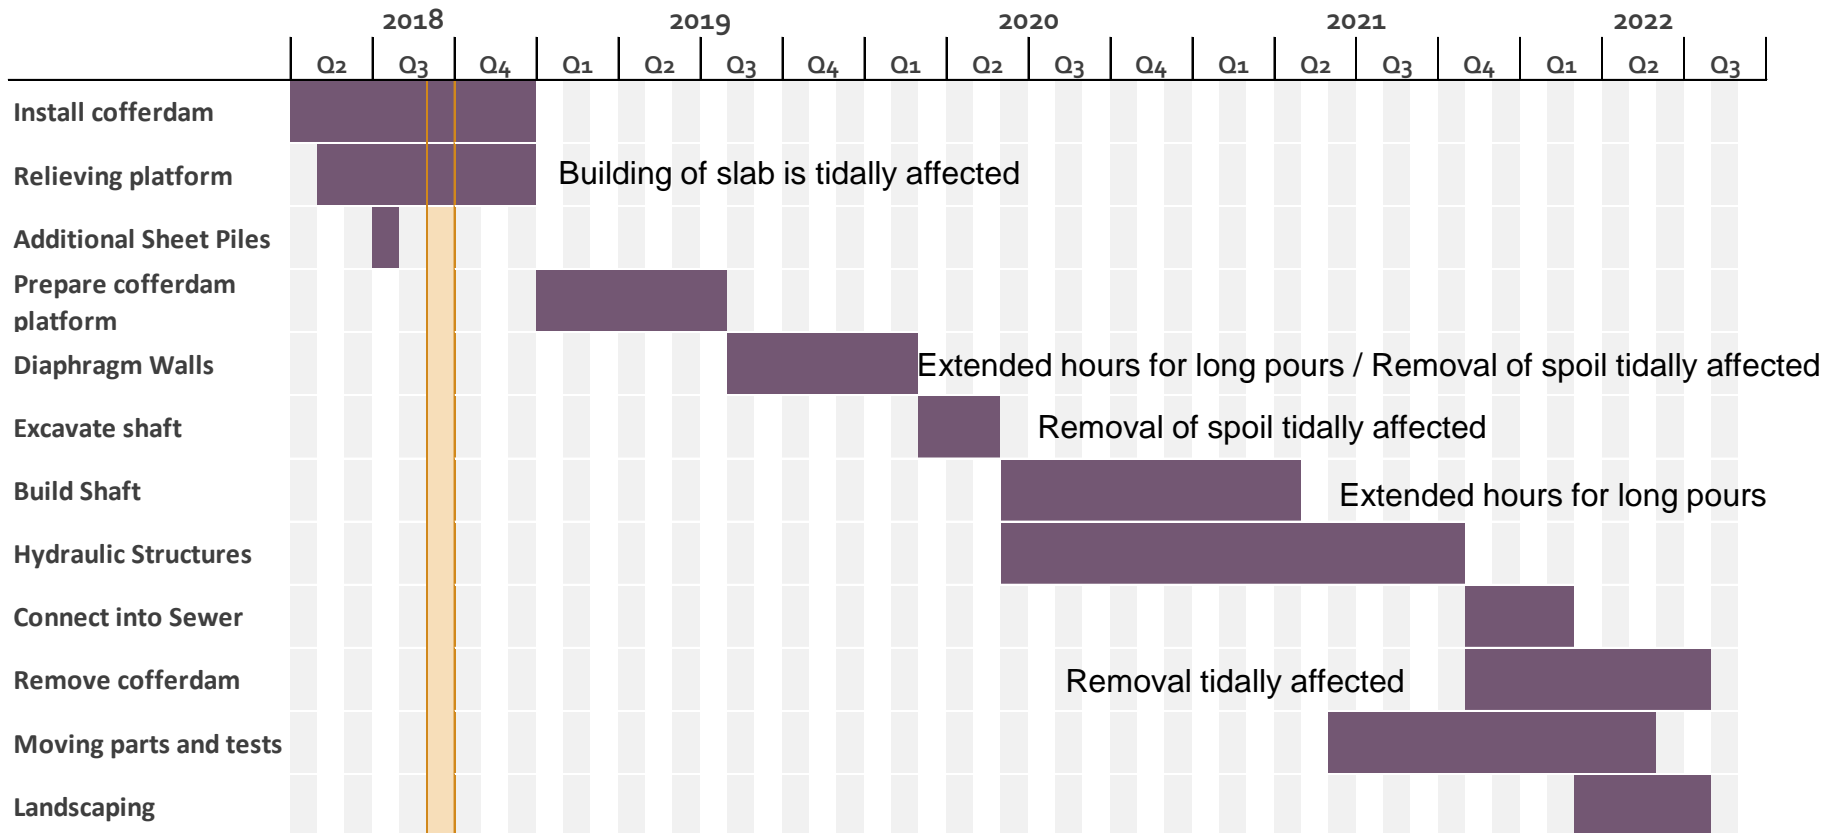

Upcoming works

- **Cofferdam strengthening works:**
 - **Concrete piles in cofferdam to finish in October**
 - **Concrete beams tying the piles together ongoing until November. These works are tidally affected**
- **Concrete piles on landside in October. A concrete slab will be built on top to support silos being delivered in November for ground improvement works to the main area of the cofferdam**
- **Concrete slab to be built within the North East Storm Relief Sewer diversion. These works are tidally affected and scheduled to start in October**
- **Ground improvement works in November for approximately 4 to 6 months. This will be deep soil mixing: a rig is used to auger down into the ground and inject and mix grout to improve the ground characteristics**

Upcoming works (plan view)

Programme

Cofferdam platform preparation now includes a scope of ground improvement works

THANK YOU
