GRANDS PROJETS

GREENWICH PUMPING STATION

NIGHT WORKS AT PHOENIX WHARF

We have started installing the slurry treatment plant (STP) at our Phoenix Wharf site, north of the Network Rail viaduct.

The STP will be a water and soil treatment system formed of various buildings and tanks for treating excavated material collected during tunnelling, from 2020.

Some parts of the STP will have acoustic enclosures. This is because tunnelling will be a continuous activity, with the STP running continuously to support it.

The water treatment unit for the STP is adjacent to the Network Rail (NWR) viaduct.

Due to the proximity to the NWR viaduct, we have to install its acoustic enclosure at night, when the lines are not operational; between approximately 00:00 to 05:00.

The works are currently planned for the night of Wednesday 19 and Thursday 20 June. If we don't manage to finish the works over these dates, we may also work on Wednesday 10 and Thursday 11 July.

The majority of work will take place during day time working hours, with preparatory works such as moving cranes, setting up and closing down activities permitted between the hours of 22:00 and 07:00.

Installation of the STP will continue for the rest of the year.

We provide further updates via email, including details on our quarterly community meetings. If you would like to receive these, please contact getinvolved@tideway.london.

KEY INFO

WORKING HOURS

- Normal: Monday to Friday: 08:00 – 18:00, Saturday 08:00 - 13:00
- Night: Monday to Sunday: 22:00 – 07:00
Up to one hour start up and shut down periods permitted

WHAT TO EXPECT

- Night works on at least two occasions to install the water treatment unit's acoustic enclosure

WHAT WE WILL DO

- Limit works to those that are essential during the night
- Continue to monitor noise and dust levels and use best practice to minimise any nuisance
