HAMMERSMITH PUMPING STATION UPDATE

Work at our Hammersmith Pumping Station site is progressing well as we continue work on the Connection Tunnel, Inlet Channel and the Interception Chamber.

As part of our works, we need to carry out maintenance on the cables located on the roof of the existing Thames Water Pumping Station.

In agreement with London Borough of Hammersmith and Fulham, maintenance work on the cables will take place every Saturday and Sunday throughout the month of September between 8am and 4pm.

While we carry out these works you will notice a small team working on the Thames Water Pumping station roof.

We do not anticipate these works to be intrusive and we will keep noise to a minimum through careful management arrangements.

If you feel affected by Tideway's work, you can contact Tideway's Helpdesk and ask to speak to your local Mitigation and Compensation Lead, who will then be able to support and advise you on the Independent Compensation Panel (ICP).

KEY INFO

Duration of work

- Extended weekend working hours for September: Saturday and Sunday 8am - 4pm
- One hour start up and shut down periods either side of working hours

What to expect

- Cable maintenance work on existing Thames Water Pumping Station roof
- Small team working on top of the roof
