Relevant Tideway site	Chambers Wharf
Decision	The requested mitigation was NOT AWARDED.
Further information required/actions arising	<p>The Panel would like to reassure the applicant that the Panel reviewed noise and air quality data from the Chambers Wharf site for a period (in excess of six months,) covering the period before and after the construction of the acoustic enclosure.</p> <p>In relation to air quality, the measured particulate levels around the site remain significantly below (less than half) the Air Quality Objective levels.</p> <p>In relation to noise, the review of noise data at the Chambers Wharf site has demonstrated to the Panel that the mitigation measures taken by Tideway reduce to levels which would not ordinarily cause disturbance or impact upon the normal use of the property. The property is substantially shielded by the site offices and acoustic enclosures. Noise levels are not currently anticipated to be high enough at this property to cause an inability to sleep during the day</p>

I confirm that these minutes are an accurate record of the proceedings of the meeting.
