HAMMERSMITH PUMPING STATION UPDATE

Work at our Hammersmith Pumping Station site is progressing well as we continue work on the Connection Tunnel, Inlet Channel and the Interception Chamber.

In the coming weeks, we will be starting works to break out a concrete lining wall within the Interception Chamber.

Breaking out works will start on Monday 30 September and will take place during our normal work hours Monday – Saturday. We expect to complete all breaking out works within four weeks

We will be monitoring noise generated and where possible, place acoustic panels around the works to reduce the impact of noise. Additionally, we will be using water to dampen down dry areas to reduce dust.

While we carry out this section of work, we will continue to keep disruption to a minimum through careful management.

If you feel affected by Tideway's work, you can contact Tideway's Helpdesk and ask to speak to your local Mitigation and Compensation Lead, who will then be able to support and advise you on the Independent Compensation Panel (ICP).

KEY INFO

Duration of work

- Breaking out concrete walls: 30 September for four weeks
- Monday – Friday: 8am – 6pm
- Saturday: 8am – 1pm
- One hour start up and shut down periods either side of working hours

What to expect

- Breaking out works: some noise will arise from site while we undertake these works

What will we do?

- We will monitor dust and noise levels
- Best practical means to minimise noise
