## CHELSEA EMBANKMENT WORKS UPDATE

Works at our Chelsea Embankment site are progressing well.

On our north site, we will soon begin work install a temporary steel flume in the existing Bazalgette Low Level 1 (LL1) sewer to allow maintain the sewer flows as we construct our overflow weir chamber.

The works will take approximately 12 weeks to complete, beginning in early-October. All our works will be taking place during core hours **Monday to Saturday 07:00 to 19:00**.

To install the flume, we will excavate within our weir chamber to 10.5m deep and expose the LL1 sewer. We will remove the top section of the brick lining of the sewer and install a temporary tubular steel pipe within to allow the flows to continue as we excavate the weir chamber beyond the level of the sewer.

We continue to monitor our works in agreement with the local authority, Royal Borough of Kensington and Chelsea.

If you require any further information or if you would like to receive invites to our community meetings for this site then please contact 08000 30 80 80 or email [helpdesk@tideway.london](mailto:helpdesk@tideway.london)

## KEY INFO

Key information here

Working hours:

- 07:00 – 19:00 Monday to Saturday

What to expect:

- Some noisy works during excavation break down

What we will do:

- Continue to monitor noise and vibration levels
- Keep you informed of upcoming works
