HAMMERSMITH PUMPING STATION UPDATE

Work at our Hammersmith Pumping Station site is progressing well.

Until Friday 14 February we will be breaking out concrete as part of our preparatory work for the culvert and deaeration excavations.

From Monday 17 February we will start the installation of sheet piling to support the ground in preparation for excavation of the culverts. These works will take three weeks to complete

In agreement with London Borough of Hammersmith and Fulham, both the breaking out and piling works will be undertaken Monday to Friday between 08:00 and 18.00.

We will continue to monitor noise and dust levels in accordance with our approved management plans whilst we carry out these works and use best practice to minimise any disruption.

If you feel affected by Tideway's work, you can contact Tideway's Helpdesk and ask to speak to your local Mitigation and Compensation Lead, who will then be able to support and advise you on the Independent Compensation Panel (ICP).

KEY INFO

Duration of work

- Breaking out of concrete until 14 February
- Installation of piling from 17 February for three weeks
- Works to be undertaken Monday to Friday 8am-6pm

What to expect

- Some noise during our normal working hours
