ALBERT EMBANKMENT FORESHORE WORKS UPDATES

Works at our Albert Embankment sites are progressing well.

From Monday, 15 February 2021 we will be working 24-hours Monday to Friday and from 08:00 – 18:00 on Saturdays within our first cofferdam, a dry working area built into the river, located north-east of Vauxhall Bridge.

We will be working these extended hours to install the internal structures within our drop shaft, which will safely transport intercepted sewage to the level of the new super sewer. The structures must be installed continuously to ensure the works is completed as safely as possible. We expect this work to be completed by Autumn 2021.

To complete this work, we will be using a crane for lifting materials and operatives in and out of the shaft. The safety alarms on the cranes will be changed to white noise to reduce any noise impact. The majority of works at night will be contained within our 50m-deep shaft and any concreting works will be completed by 22:00.

If you have any queries during this period, please feel free to contact the Tideway 24hr Helpdesk on 08000 30 80 80 or email helpdesk@tideway.london

KEY INFO

Working hours:

- Monday – Friday, 24-hour working
- Saturday – 08:00 - 18:00

What to expect:

- Working within the shaft at night.
- Use of a crane for lifting at night

What we will do:

- Monitor any noise impact of these works.
